

Screen-1

Splash Screen - Part 1(only when user is new and first time came)

Description

1. You should make splash screen the right way that is on
2. <https://medium.com/@ssaurel/create-a-splash-screen-on-android-the-right-way-93d6fb444857>
3. You can make image to be displayed in the screen from freelogoservices.com, you need not to pay just make the logo and then screenshot it.
4. You need to make a button on the bottom right of the screen Saying “Next” Here.
5. The content of the splash screen would be most probably the logo of GoodGrades company
6. Its background will be white and Logo should be colourful and button should ripple when touched

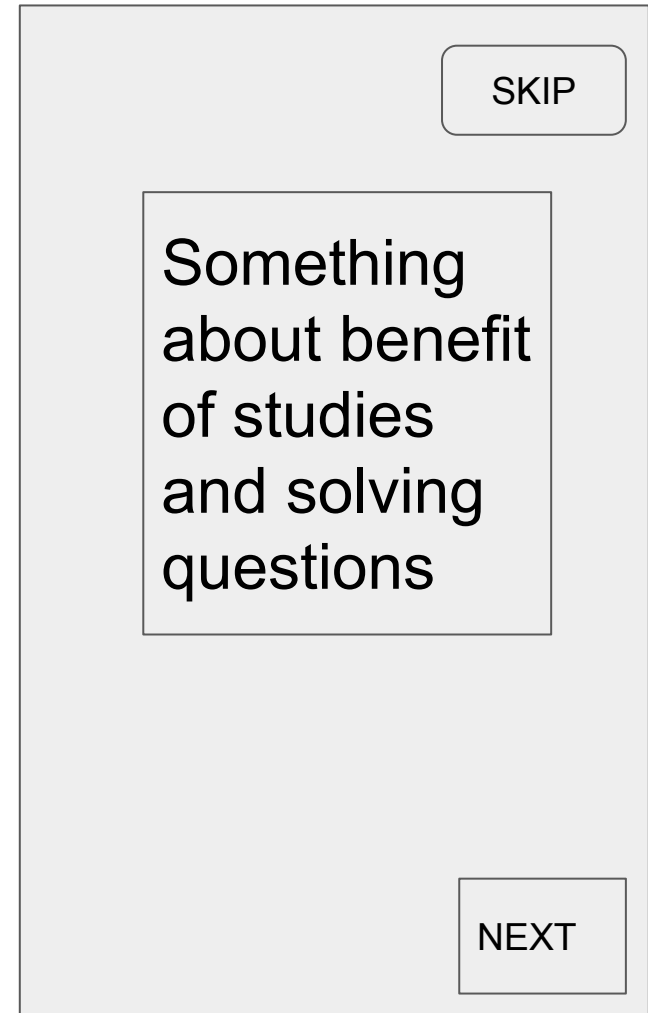

Screen-2

Splash Screen - Part 2(For new user only)

Description

1. You should make splash screen the right way that is on
2. <https://medium.com/@ssaurel/create-a-splash-screen-on-android-the-right-way-93d6fb444857>
3. You can make image to be displayed in the screen from freelogoservices.com, you need not to pay just make the logo and then screenshot it.
4. You need to make a button on the bottom right of the screen Saying “Next” Here.
5. The content of the splash screen would be most probably the something study and question services of GoodGrades company
6. Its background will be white and Logo should be colourful and button should ripple when touched

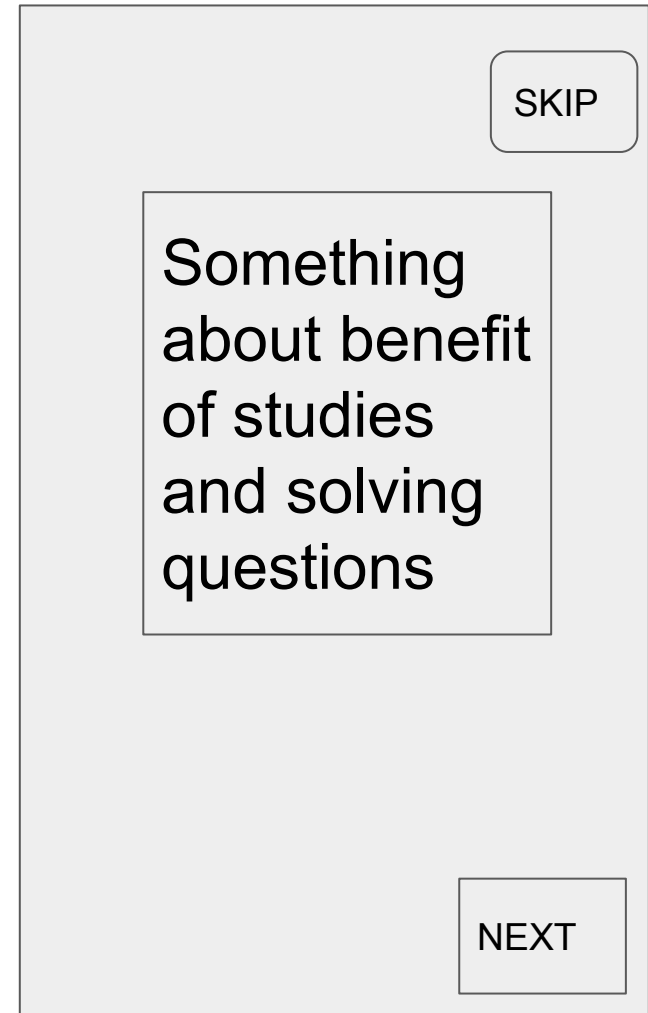

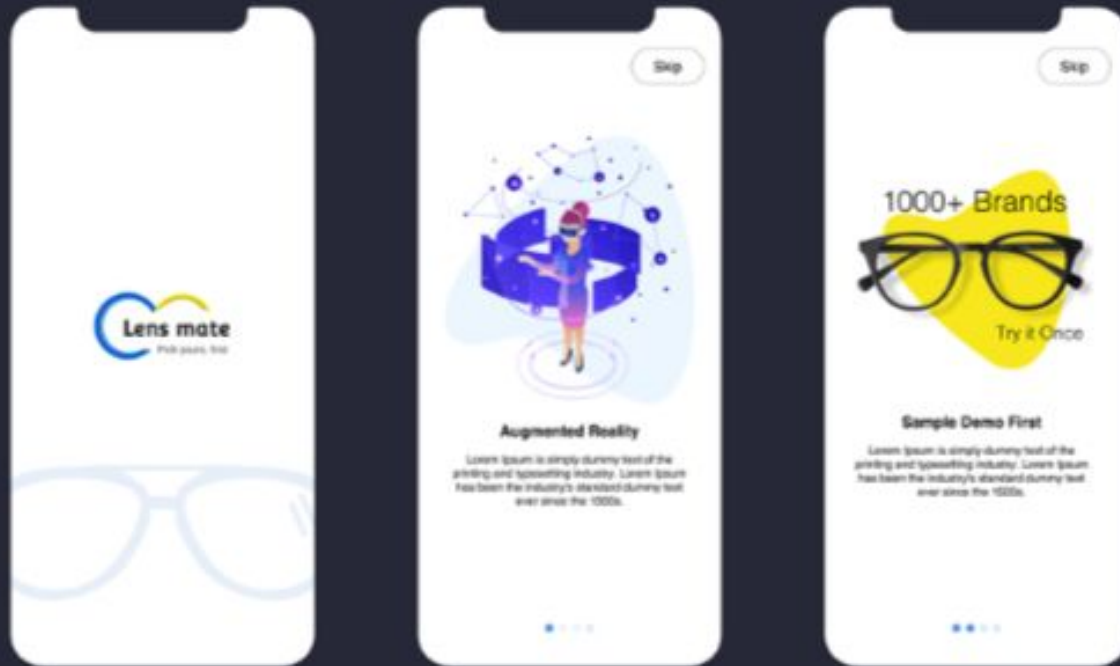

Screen-3

Splash Screen - Part 3(for new user only)

Description

1. You should make splash screen the right way that is on
2. <https://medium.com/@ssaurel/create-a-splash-screen-on-android-the-right-way-93d6fb444857>
3. You can make image to be displayed in the screen from freelogoservices.com, you need not to pay just make the logo and then screenshot it.
4. You need to make a button on the bottom right of the screen Saying “Next” Here.
5. The content of the splash screen would be most probably the earn money service of GoodGrades company
6. Its background will be white and Logo should be colourful and button should ripple when touched

This is the model we will use for the above SplashScreens

Most probably skip button we will include if possible

Otherwise we will show the two rest screens only if the user is new or first time has opened the android app

Images I have thought of

For First
Screen
Logo at
left

For
second
Screen
left one

For third
Screen
the
picture
above

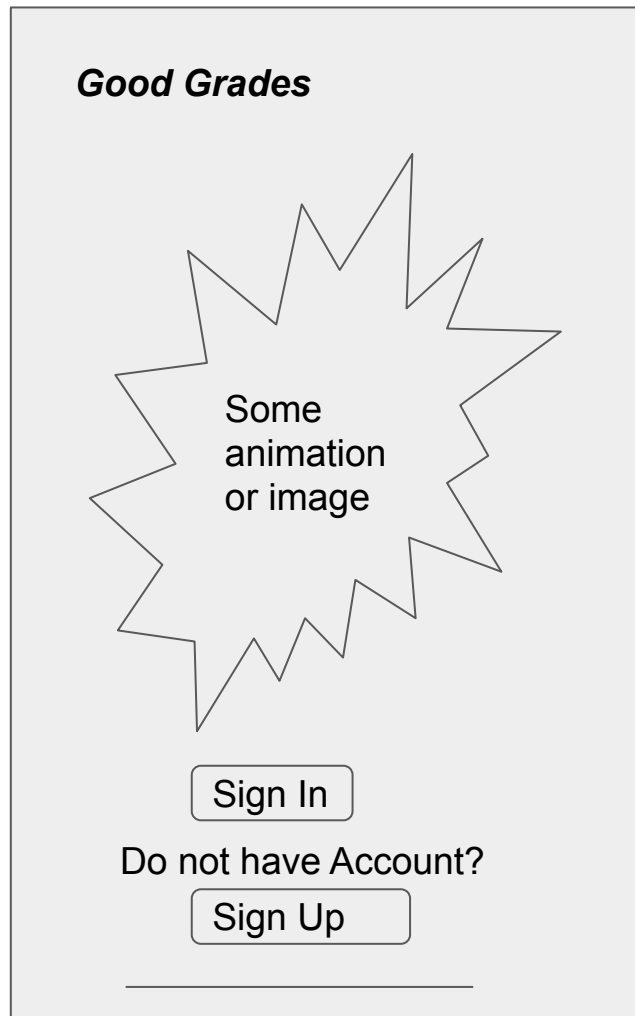

Screen 4

Main Screen One (Entry Point)

Here a nice picture would be present
That describes GoodGrades And there
will be button for sign up and sign in

This should be very attractive to the
user and should be made very nicely

The line at the end gives a nice view

Screen 5

Sign Up screen

In this screen the back arrow colour should be blue if background is white

For mobile and email validation you can

<https://stackoverflow.com/questions/22505336/email-and-phone-number-validation-in-android>

Refer this link

Now the second check would be by using the OTP verification and email verification for the user that will be by the Backend Team

Screen 12

Track Challenges

In this screen the user will track his applied challenges

The image shows a wireframe for a mobile application screen titled "Screen 12: Track Challenges". The screen is light gray and contains four identical challenge tracking cards stacked vertically. Each card is outlined in purple and has a rounded rectangle shape. Inside each card, on the left, is a circular icon placeholder with the text "Icon" inside. To the right of the icon, there is a "Subject" label in a purple-bordered box, and next to it is a "Beginner" difficulty level dropdown menu. Below the "Subject" label is a "Status" label in a gray-bordered box, followed by a long rectangular input field for tracking progress.

Screen 13

Submitting solution and question description

When pick solution file is selected it will open a file picker and there he can select his file from the file explorer and when he will submit solution then the solution file will come to our database and there we can analyze it nicely.

This status will lead one to the next screen

Doubt clearance Realtime Chatting

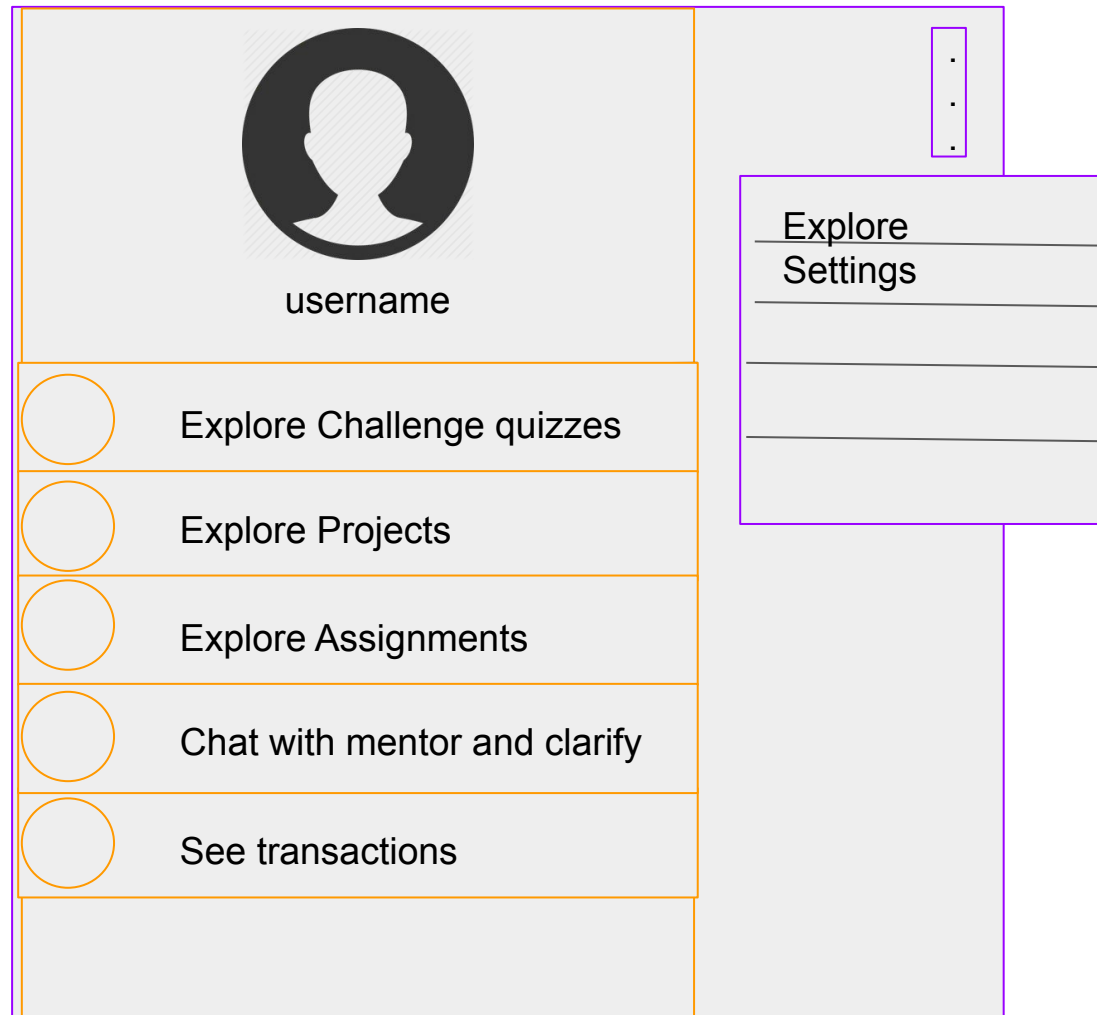

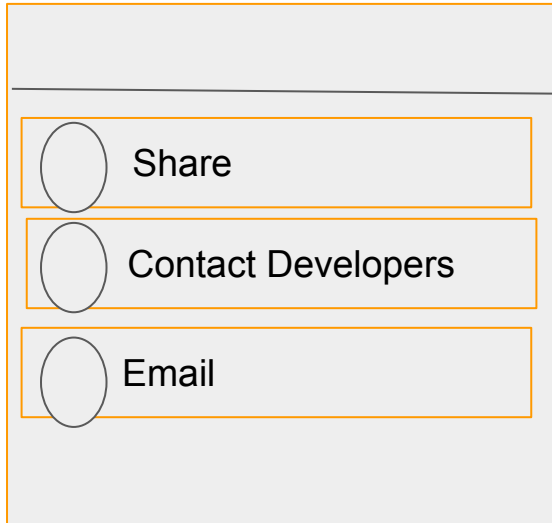

So in this feature i tried but in youtube
it is associated with all the professional
givers of chatbox so

Best is that we connect it with our
mobile friendly website url chatbox
which can be easily implemented

Or means not knowing correctly

Navigation Menu

This navigation menu will contain all screens and it will look as follows
